

Parts of the company of former IndustriTeknik is now acquired by Swematec AB

In particularly the acquire is concerning the business area, plywood, and the name of IndustriTeknik and all rights goodwill logos, advertising and customer lists, etc. linked to it. The purchase also includes parts of other historical activities that are "outside the VA-groups's strategic interest"

Former Nya IndustriTeknik I Hässleholm AB changed autumn 2015 first name to VA Automation AB, by the end of the year they also merged with VA Components AB - For the precise definition of their future business focus; we refer to their own sources - www.va-automotive.com

Swematec is owned and founded in 2013 by Anders Johansson, the former co-owner of IndustriTeknik, Anders has worked at IndustriTeknik in different positions from technician to CEO since 1988

Swematec has built up a machine sales business, primarily in sheet metal machines. Swematec has also focused on the business of plywood and now has a full range of both machines for the production of plywood boxes, a fairly comprehensive range of metal parts for various types of plywood and wood packaging. This gathered and marketed under brand **Plyma**

Swematec / Plyma and IndustriTeknik - will be after the merge be absolute world leader in the business area - machinery and metal parts for plywood and wooden packaging.

Late 2014 Swematec bought also the former **Göinge Montage** after bankruptcy. Nya Göinge Montage AB includes forging business, industrial services, construction and contracting. Nya Göinge Montage also began almost immediately after the restart, a development towards more precision engineering.

In 2015, Nya Göinge Montage re-hired large parts of the former "forging staff", as well as to "gather together" laid-off workers - read gathering skills "- from IndustriTeknik.
